

## **Battlestaves by McKillynu**

### **A selection of 36 battlestaves for wizards, sorcerers, druids and bards.**

Credit: ALL credit goes to McKillynu for this work as I did NOT make any of this stuff. Just found this on my game directory and decided to share with the community. The only thing I did do was make an area module with labeled chests containing said staves, divided according to class. Thanks go to McKillynu for their awesome contribution.

What this includes:

There are two zip files, one for the area module titled 'Battlestaves', and one for the actual erf from which I got the staves from to begin with.
